PROJECTS (GitHub)

1. Wedding Art – Business Portfolio Website

Type: Academic Project (College)

Role: Frontend Developer (Team Project)

Duration: (3 months)

Tech: HTML5, CSS3, JavaScript, Bootstrap, Git, GitHub

Description:

Designed and developed the complete frontend UI for a responsive business portfolio website as part of a college academic project.

Implemented layout structure, styling, and mobile-first responsiveness using HTML, CSS, and Bootstrap.

Built interactive UI features such as image gallery and filters using JavaScript.

Integrated frontend with backend APIs developed by a professional IT developer.

Collaborated in a team environment and used GitHub for version control.

2. Job-Ready Portfolio Website

Built a fully responsive personal portfolio using HTML, CSS, JavaScript, and Bootstrap.

Implemented interactive UI, smooth scrolling, and mobile-first design.

Deployed using GitHub Pages.

3. React Job Listing / Product App

Built a React app using components, props, and state.

Fetched data from public API.

Implemented search, filter, and dynamic UI updates.
